Dear

Southern Water provides waste water services to me and my family. The difference in the Bill between this year and last year is huge and well over inflation and I understand that next year's Bill is going to go up again.

This is just not fair on the working man and all this against the general Cost of Living crisis the UK is going through at the moment.

I read on a website <https://bad.southernwater.org/> that you are the best person to contact about this and I hope you will be able to put a break on these excessive increases.

I look forward to your reply and hopefully plans to prevent what many see as a crisis in the making. Working people are being forced to make a choice between paying for excessive bonuses and going without.

Yours,
